# Arun Rajoriya

Aspiring Software Engineer | Python | React.js | Generative AI

9691310108 | arunrajoriya2004@gmail.com | LinkedIn | GitHub | Portfolio

## Professional Summary

Software Engineer with hands-on experience developing backend APIs, full-stack web applications, and Generative AI solutions using Python, FastAPI, React.js, and Retrieval-Augmented Generation (RAG). Experienced in REST API development, automated testing, database integration, debugging, and application deployment. Strong foundation in data structures, algorithms, object-oriented programming, and software engineering principles.

## Work Experience

**MPSEDC (State IT Center)** — Bhopal, India
*Full-Stack Developer Intern* — *Jan. 2026 – Mar. 2026*

- Developed a crime analytics dashboard using **Python, FastAPI, and SQLite** to explore over **10,000 crime records**, supporting data analysis and reporting workflows.
- Integrated an **AI-powered RAG chatbot** with natural-language question answering over crime data, connecting retrieval workflows with an LLM to simplify access to relevant information.
- Designed and integrated **RESTful APIs** for frontend and AI functionality, recording response times below **200 ms** in project testing.
- Contributed to application development, API integration, debugging, and validation while collaborating on a government technology project.

## Education

**Technocrats Institute of Technology Excellence** — Bhopal, India
*B.Tech. in Computer Science and Engineering (AI & ML)* | *CGPA: 7.77/10* — *2022 – 2026*

## Technical Skills

**Programming Languages:** Python, C++, JavaScript
**Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS
**Backend Development:** FastAPI, RESTful APIs, API Integration, JWT Authentication
**Generative AI:** Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Prompt Engineering, Whisper, Groq API
**Databases:** PostgreSQL, SQLite, Redis
**Testing:** Automated Testing, API Testing, Integration Testing, Debugging, Error Handling
**Developer Tools:** Git, GitHub, Docker, Swagger, Render, Vercel
**Computer Science:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Software Development Lifecycle (SDLC)

## Projects

**PhishGuard AI – Phishing URL Detection** | *Python*, *FastAPI*, *XGBoost*, *PostgreSQL*, *Redis* | Live Demo

- Developed a **FastAPI REST API** for phishing URL detection, integrating model inference, JWT authentication, request validation, and external threat-intelligence checks.
- Trained and evaluated an **XGBoost classifier** using 40 URL-derived features, achieving a **99.65% F1-score** and **99.81% ROC-AUC** on an unseen-domain test set.
- Integrated **PostgreSQL, Redis, and VirusTotal API** for scan-history storage, caching, and external URL threat-intelligence checks.
- Implemented **98 automated tests** covering application functionality and API behavior, alongside error handling, security headers, and concurrent-scan validation; deployed the frontend and containerized backend.

**AI-Powered Meeting Intelligence Platform** | *Python*, *FastAPI*, *Whisper*, *Groq*, *LLMs* | Live Demo

- Built and deployed an AI-powered application that converts recorded meetings into structured summaries and actionable items using speech recognition and large language models.
- Integrated **Whisper-based speech-to-text** transcription with LLM processing to transform meeting recordings into readable transcripts and meeting insights.
- Developed **21 FastAPI REST endpoints** for meeting management, transcript storage, and application workflows, with interactive API documentation through Swagger UI.

**Bandhan Elevators – Client Website** | *HTML5*, *CSS3*, *JavaScript*, *Vercel* | Live Website

- Designed, developed, and deployed a responsive, multi-page website for a real-world elevator company, presenting its products, services, gallery, and business information.
- Implemented responsive user interfaces and **WhatsApp/contact integration** to enable customer enquiries across desktop and mobile devices.
- Configured custom-domain hosting and HTTPS deployment, managing the website from development through production delivery.
